VASQUEZ, PAUL LUISER MERCADO

paulluiser@gmail.com

PROFESSIONAL PROFILE

IT Project Manager with hands-on experience leading cross-functional software teams across both Agile/Scrum and Waterfall methodologies, from requirements discovery and project planning through design, development, testing, user acceptance, deployment, and post-implementation support. Experienced in facilitating Agile ceremonies, coordinating sprint-based delivery, managing structured Waterfall phases, and adapting project approaches based on business and delivery requirements. Skilled in stakeholder management, BRD and SRS development, scope and change control, risk and issue management, and tool-based project tracking.

CORE COMPETENCIES

- **Project Delivery** - Agile/Scrum, Waterfall, and hybrid delivery; sprint and backlog management, Agile ceremonies, phase-based planning and execution, requirements and change control, QA/UAT coordination, deployment, and post-deployment support.
- **Documentation** - business requirements document (BRD), system requirements specification (SRS), business rules, process workflows, status reports, risk logs
- **Tools** - Jira, Trello, Excel, Google Sheets, Google Analytics, Google Workspace, Figma
- **AI & Automation** - proficient in using generative AI and agentic AI tools for requirements analysis, documentation, workflow automation, rapid prototyping, research, and project management decision support.
- **Technical Knowledge** - software development life cycle, business analysis, programming fundamentals, database fundamentals, infrastructure fundamentals, cybersecurity fundamentals

WORK EXPERIENCE

December 2025 - Present
IT Project Manager
Intellismart Technology Inc., Quezon City, Philippines

- Leads cross-functional teams in achieving goals aligned with predetermined allocated resources and organizational standards.
- Authored the officially signed business requirements document and system requirements specification used in the entire software development cycle.
- Tracks project progress and milestones through utilization of project management tools like Jira.
- Integrated generative and agentic AI into project management workflows to accelerate requirements analysis, documentation, research, prototyping, and operational decision-making.
- Handled multiple concurrent projects and spearheaded the implementation of Agile-Scrum methodology across active projects.

June 2025 - October 2025
Associate, IT Project Manager
Go8 Technology Inc., Paranaque City, Philippines

- Led cross-functional teams to deliver systems aligned with the predetermined requirements.

- Managed stakeholder relationships and effectively delivered data-driven reports, updates, and proposals.
- Utilized Google Analytics to initiate and facilitate internal change requests.
- Oversaw project lifecycles from requirements gathering and analysis to post-deployment support and made data-driven decisions for the team.
- Leveraged generative AI and agentic workflows to streamline requirements analysis, project documentation, research, prototyping, and repetitive project management processes.
- Implemented process improvements internally by utilizing tools like Trello and actively diagnosed technical bottlenecks by hosting timely stand-up meetings.

February 2025 - May 2025
Junior Project Management Intern
Go8 Technology Inc., Ortigas Center, Pasig, Philippines

- Initiated the system requirements gathering and analysis.
- Made data-driven directives to improve team productivity.
- Facilitated team collaboration and ensured that the development is aligned with the target timeline.
- Managed project documentation, resource allocation, and risk logs.

January 2022 - May 2025
Research Consultant
Freelance, Remote

- Conducted upskilling meetings for clients.
- Analyzed data sets to come up with sound conclusions and formulate action plans.
- Facilitated strategic meetings concerning resource, timeline, and milestone management.
- Improved research processes by proposing various methodologies.

EDUCATION

September 2021 - July 2025
Bachelor of Science in Computer Science
STI College Caloocan

- Graduated as Magna Cum Laude with a GWA of 1.21.
- Actively represented the branch in the city, regional, and nationwide competitions.

SELECTED AWARDS AND RECOGNITION

- **Magna Cum Laude**, July 2025
- **Thesis Awardee for Web Development and Content Creation**, 2024 ICTE Symposium and Colloquium, December 2024
- **Code Green Representative** for STI College Caloocan, April 2024
- **4th Runner-Up, National Level,** Think Quest - Tagisan ng Talino, May 2023

PROJECTS

January 2026 - July 2026
Enterprise Inventory-Accounting Management System
Intellismart Technology Inc., Quezon City, Philippines

- Spearheaded the data gathering sessions to capture client requirements, pain points, and overall current state.
- Authored and published an end-to-end signed business requirements document (BRD) and system requirements specification (SRS) for the whole system.
- Applied AI-assisted requirements engineering to analyze business processes, identify requirement gaps, structure system specifications, and accelerate documentation.
- Facilitated change request management processes.

August 2025 - October 2025
Subscription-based Adult Media Streaming Platform
Go8 Technology Inc., Paranaque, Philippines

- Spearheaded the comprehensive end-to-end system overhaul, coordinating cross-functional teams to ensure seamless integration, alignment with business goals, and timely delivery of an optimized solution.
- Facilitated client system walkthroughs and user acceptance testing (UAT) sessions, enabling clear communication and collaboration to validate functionality and ensure client satisfaction.
- Conducted thorough reviews to ensure system features aligned with defined requirements.

July 2025 - August 2025
Internal Management Website and Tour Tracking App
Go8 Technology Inc., Paranaque, Philippines

- Led system requirements gathering, client communication, and business analysis to ensure alignment with client objectives.
- Spearheaded the system development life cycle, overseeing the delivery of a high-fidelity prototype.
